

THE RADIANTLIGHT Mounting Instructions

Stake Mounted Option Installation

You will get 4 stakes, 4 locking screws, 1 TedStuff tightening wrench, to attach landscape spikes to fixture. This will turn your Deck Mounted light into a landscape spike mounted light so you can install it in the Earth.

Position stake as pictured and line up holes.

Install locking screw.

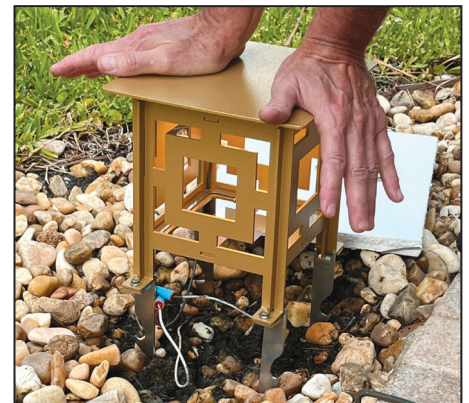

Use wrench provided to tighten locking screw.

Attached the 2 wires from RadianLight the to your new or existing 12 to 15 volt low voltage lighting system wire.

Bury the wire and position in place.

You can push down into place from the top. Be careful to push down the sides over the mounting screws so the cover will not bend - or by gripping the sides of the light to push down.

Level in place.

Fill in the soil, mulch, or rocks, etc. and enjoy.

THE RADIANTLIGHT The Landscape Light Collection

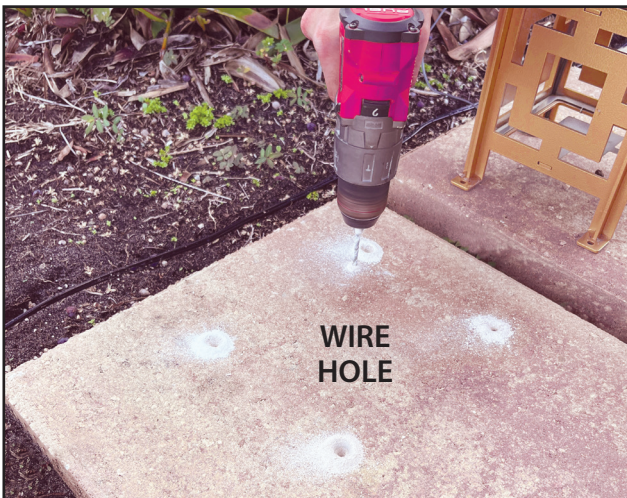

Deck Mounting Instructions

Locate where you want to install your Lights.

Mark feet holes with marker, don't forget to mark the hole for the low voltage wire to connect to the Lamp.

Drill 4 holes in the Deck for the feet attachment and one for landscape connection wire.

Attach the 2 wires from the Radiant Light to your new, or existing 12 to 15 volt, low voltage light system wire.

Attach to Deck, depending on your surface, wood, concrete, pavers etc. Any Hardware Store can direct you to the proper fastener type.

ENJOY!!
