## ADVISORIES

### **! ATTENTION!**

#### **CAUTION -- Transportation and Handling**

- Florence 4C units are heavy. Use caution when lifting and carrying to avoid injury.
- Lay boxes flat. Do not stand on end as box could fall over and cause injury.
- Pinch hazard exists when placing the unit in the collar. Keep fingers and hands clear to avoid injury.

#### **CAUTION -- Installation**

##### **Failure to adhere to the following instructions and warnings could result in serious injury.**

- The mounting screws included in this kit are intended to be used to install the 4C collar to a conventionally constructed wood-stud wall. If the 4C collar is to be mounted to a surface other than a conventionally constructed wood-stud wall, it is the installer's responsibility to ensure that the proper mounting hardware and quantity are used.
- It is the installer's responsibility to ensure that the wall is of adequate strength to support the weight of the 4C collar, 4C mailbox, and contents.
- The collar must be attached to at least two (2) wood studs and each slot row needs to have two (2) screws (one per stud) for proper and secure installation.
- Florence 4C units are heavy. Do not stand 4C units up without support to prevent tipping.
- Mailboxes may tip out of collar until secured, possibly resulting in the mailbox colliding with a person and causing serious injury.
- Florence 4C units are also front-heavy when the master doors are open. Units must be braced or held in place until secured to the collar. Installer should support unit or have assistance holding the unit in place before opening the master doors. Failure to do so could result in serious injury.

# GENERAL INFORMATION

**FOR REPLACEMENT PARTS SPECIFY HEIGHT, FINISH,  
SINGLE OR DOUBLE WIDE, AND PANEL NEEDED (TOP/  
BOTTOM, SIDE, OR BACK).**

# BACK AND SIDE ASSEMBLY

## Surface Mount Collar for versatile™ 4C mailbox suites

- 1.** Place the back panel, with warning label facing up, on a clean non-abrasive surface to keep from damaging the finish.
- 2.** Align one of the two side panels to the edge of the back panel.
- 3.** Secure the side panel to the back panel using one (1) #10-32 x 1/2" BHCS T20 Torx screw **(48291)** thru each hole in the edge of the side panel.
- 4.** Align the other side panel to the opposite edge of the back panel.
- 5.** Secure the side panel to the back panel using one (1) #10-32 x 1/2" BHCS T20 Torx screw **(48291)** thru each hole in the edge of the side panel.

# TOP AND BOTTOM ASSEMBLY

## Surface Mount Collar for *versatile™* 4C mailbox suites

1. Align one of the two top/bottom panels to the existing assembly.
2. Secure the top/bottom panel to the assembly using three (3) #10-32 x 1/2" BHCS T20 Torx screws (**48291**) per side panel and one (1) per hole along the back panel.
3. Align the other top/bottom panel to the opposite end of the existing assembly.
4. Secure the top/bottom panel to the assembly using three (3) #10-32 x 1/2" BHCS T20 Torx screws (**48291**) per side panel and one (1) per hole along the back panel.

# MOUNT COLLAR TO WALL

## Surface Mount Collar for *versatile*<sup>TM</sup> 4C mailbox suites

**WARNING: READ ALL NOTIFICATIONS ON P. 2 BEFORE MOUNTING THE COLLAR TO THE WALL.**

- 1.** Determine the vertical mounting height for the 4C surface mount collar using the USPS installation requirements (p. 4). Mark either the top or bottom alignment point on the wall.
- 2.** Locate and mark at least two (2) 2x4 (or greater) wood studs. Align the unit with the marks.
- 3.** Hold the collar in place against the wall and install two (2) #8 x 2" pan-head T20 Torx wood screws (**64225**) per slot row, one (1) in each of the studs. See the chart below for minimum quantities of mounting screws to be installed per suite.

6-high Suite -	12 screws
7-high Suite -	12 screws
8-high Suite -	12 screws
9-high Suite -	16 screws
10-high Suite -	16 screws
ADA Suite -	16 screws
11-high Suite -	16 screws
12-high Suite -	16 screws
13-high Suite -	16 screws
14-high Suite -	20 screws
15-high Suite -	20 screws
16-high Suite -	20 screws

## MOUNT COLLAR TO WALL

# INSTALL 4C MAILBOX INTO COLLAR

## Surface Mount Collar for versatile™ 4C mailbox suites

**WARNING: READ ALL NOTIFICATIONS ON P. 2 BEFORE MOUNTING THE 4C MODULE IN THE COLLAR.**

Refer to the versatile™ 4C Mailbox Suites Installation Manual (206362), included with your Florence 4C mailbox, or available at [www.florencemailboxes.com](http://www.florencemailboxes.com), for how to open the module.

### 1. For Double-Wide Florence versatile™ 4C Modules:

- A.** Place the 4C module into the collar opening until the trim is flush against the collar surface.
- B.** Open the right master door until the hold open arm engages and install #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) in each hole along the right-hand outer frame member.
- C.** Partially open the left master door until the right master load door can be completely closed.
- D.** Open the left master door until the hold open arm engages and install #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) in each hole along the left-hand outer frame member.
- E.** With both the left and right master doors open and hold open arms engaged, install four (4) #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) along the top, and four (4) #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) along the bottom of the module.

### 2. For Single-Wide Florence versatile™ 4C Modules:

- A.** Place the 4C module into the collar opening until the trim is flush against the collar surface.
- B.** Open the master door until the hold open arm engages and install #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) in each hole along the right-hand and left-hand outer frame members.
- C.** With the master door open and hold open arm engaged, install two (2) #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) along the top, and two (2) #8-32 x 1" BHMS 15IP Torx+ Taptite II screws (**64635**) along the bottom of the module.
