LOCK OPTIONS

Our goal is to provide each customer with the mailbox that best suits their individual need. To fulfill this, we have created THREE lock options/levels to choose from and made them available on nearly every Letter Locker product. Review the options below to see which level works best for you!

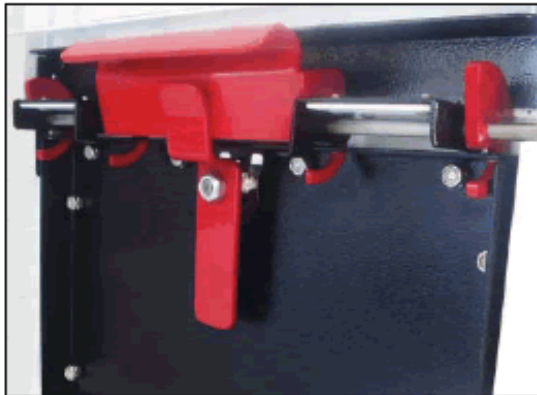

LEVEL 1: STANDARD HOOK CAM (LATCH)

Hook Lock engaged on door

LEVEL ONE has a HOOK shaped cam (latch) that is made of 3/16" thick stainless steel. The hook design actually "grasps" the box frame, locking itself securely into place.

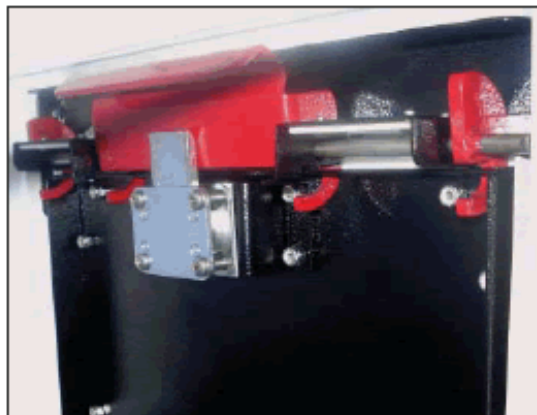

LEVEL 2: THE CLAW LOCK

Locked Door - Inside View

LEVEL TWO includes our new 5-point locking mechanism, the CLAW Lock. An 11 gauge stainless steel cam (latch) pushes up on the lift plate, rotating FOUR stainless steel CLAWS into the door bracket receiver. The CLAW Lock quadruples the security of the lock!

LEVEL 3: THE CLAW LOCK WITH MEDECO DEADBOLT

Locked Door - Inside View

LEVEL THREE uses the same new CLAW Lock design, but adds a high security Medeco dead bolt! This is the ultimate in security, no other mailbox on the market offers this level of protection!
