

# Aluminum Boxes - Data Distribution System

## DATA DISTRIBUTION SYSTEM PRIVATE ACCESS

Salsbury 2400 series data distribution system aluminum boxes have 1/4" thick extruded aluminum doors with a durable powder coated aluminum finish. Each door includes a 3/4" high door slot, a five (5) pin cylinder cam lock with two (2) keys and is hinged horizontally at the bottom. Alternative locking systems are available - see aluminum mailbox options on page 39. Doors are available without slots upon request. The compartments have open backs (rear covers for a column of data distribution boxes #2451 and rear covers for individual data distribution boxes #2452 are available as options upon request) and are constructed of 20 gauge steel. All units have the same outside dimensions. Data distribution system boxes are designed to be installed between rack ladders (#2400). The rack ladders support five (5) units to form a column of boxes. Data distribution system boxes can also be used in Free-Standing Mail Centers (see pages 44-45).

2406

Data distribution doors are available without slots as an option upon request and can accommodate combination locks #2486 (combination locks are not available on doors with slots or on model #2401).
